

Hosiery
Freedom to choose

6 versatile fabrics

for all stages of Lymphoedema
and Chronic Oedema

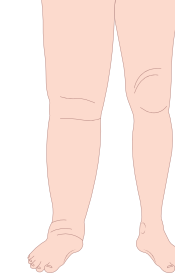

Stage 1

An early accumulation of fluid relatively high in protein content which subsides with limb elevation.

Veni

pg.12

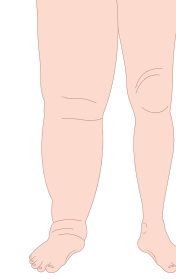

Stage 2

Limb elevation alone rarely reduces tissue swelling and pitting is manifest.

Star Cotton

pg.14

Late Stage 2

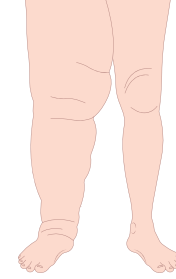

Tissue fibrosis is evident with or without pitting

Doktus

pg.16

Pertex Light

pg.18

Stage 3

Skin folds, fibrotic skin changes, fat deposits with warty overgrowths evident. Tissues are firm and do not pit.

Pertex

pg.20

Goldpunkt

pg.22

Stockings that stay put

Grip Tops

Swelling associated with lymphoedema can fluctuate throughout the day. These attractive silicone grip tops keep them in place without irritation.

Sewn Finish

Strong Plain

Fine Lace

Strong Lace

A close-up photograph of a person's leg being measured with a white tape measure. The tape measure has the website 'www.hadhealth.com' printed on it. A person's hands are visible, holding the tape measure around the leg. The person being measured is wearing a white short-sleeved shirt with a blue stripe on the sleeve.

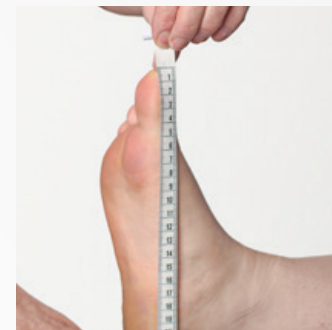

Get the perfect fit

The widest range of sizing

A wide range of sizes are available with only a few simple measurements required.

A uniquely light and stretchy flat knit

Easy to apply due to how much it will stretch with minimal effort. Once on the limb, conforms like you would expect a flat knit to conform, without cutting in.
